Art Unit: 1618

Claims 1, 3, 8-10, 12-27, 29-32 and 35-45 are presented for examination.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1, 3, 8-10, 12-27, 29-32 and 35-45 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The claimed invention is directed to the phrases of "an opioid agonist" and "an opioid antagonist". The specification discloses examples of structures of some compounds within the scope of what is claimed. However, there is no evidence that there is any per se structure/function relationship between disclosed opioid agonists, opioid antagonists and any others that might be found using the claimed method. Structural identifying characteristics of group of opioid agonists, opioid antagonists are not disclosed.

Therefore, the claimed invention is not supported by an adequate written description.

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Claims 1, 3, 8-10, 12-27, 29-31 and 41-44 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 1-55 of prior U.S. Patent No. 6,375,957. This is a double patenting rejection.

Applicant's arguments and remarks have been carefully considered, but are not deemed to be persuasive. Applicant's arguments directed to amounts and the effects elicited appear directed to process limitations while a composition is being claimed.
